

# Clicklease: A Path to Ownership

As the name implies, Clicklease offers a type of financing classified as a lease. It provides a lot of flexibility and enables a wide range of approvals. But there are some misconceptions. One of the most common questions is about how a customer can own their equipment and how they can end their lease early.

## Clicklease agreements are non-cancellable, but there are a few options:

- 1. Standard Lease + Purchase Option:** Leases are set up for a set number of monthly payments plus a purchase option (ex: 22 monthly payments + a purchase option). The customer can make their 22 lease payments and then pay the purchase option in one payment or broken into smaller monthly payments roughly equal to their regular monthly payments (ex: 22 monthly payments + purchase option broken into 2 payments, for a total of 24 months).
- 2. The Early Purchase Option:** Customers can save a lot of money by utilizing the Early Purchase Option. This is only available before their 5th monthly payment. The customer makes all their regularly scheduled payments up to that point, plus one lump payment of the entire invoiced amount.
- 3. 5% Early Buyout:** Any time after their 5th monthly payment, customers can make one lump payment comprising all of their remaining monthly payments. Clicklease will offer a 5% discount as a customer courtesy.

Most customers choose Option 1. But whichever option customers choose, they can own their equipment with simple, predictable monthly payments.
